# Our Services

- Application Development & Maintenance**

IT applications play a major role in driving success. We offer complete application development and management services across a comprehensive range of platforms to help you achieve your business goals.
- Business Process Management & ERP**

We offer high quality and affordable ERP implementation services. We also offer customized Enterprise CRM, Sales and Loyalty Management, and other business applications which integrate with existing systems.
- Web Portals, Ecommerce And Mobile Apps**

New Websites, Maintenance of existing websites, Domain and Hosting, Multi Lingual Sites, Content Management Systems and eCommerce - we are your one stop solution for your online presence.

# Our Services

- Logo and Corporate Identity**

Your logo is the image conjured up by your customer's mind when you mention it. It is the visual and sensory personification of your brand. We help you deliver a corporate identity which leaves a long lasting impression on your customers.
- Digital Marketing & SEO**

We support your online – organic search rankings and paid marketing effort by providing a comprehensive digital marketing solution on Instagram, Facebook, LinkedIn, Google, etc. We ensure best possible ROI, ensuring your brand leaves a deep impact.
- User Experience Design**

Your users are an integral part of your IT system. We offer solutions that are user-friendly, making it easy for your users to adapt to the system easily.

# Our Services

- IT Infrastructure Management**

We offer comprehensive server management, monitoring services, enterprise networking and security, vulnerability and threat management and disaster recovery to ensure your IT infrastructure is secure, scalable and highly available.
- Robotic Process Automation**

Is there a single process which requires more than 10 humans? If there are piles of Excel being generated, we can help in automating tasks and gain savings of at least 80%
- Dedicated IT Staffing**

We can provide full-time IT Staff dedicated to your business or project for long and short periods of time, on a need basis. This gives you greater flexibility to run your business.

# WHY US ?

---

## TRUST

Running successfully since 6 years. Clients spread across 15 countries.

## SUPPORT 24/7

Our staff is always available to provide the best possible support . When necessary we can work with partners to provide additional services.

## MULTIPLE ENGAGEMENT MODELS

We understand your requirement, and suggest an IT solution that will meet your needs

## HIGH STANDARDS

Our thought process is driven by User Experience. Our implementation is driven by Security and Performance.

## COST EFFECTIVE

Organizations typically save between 30% to 80% while working with us

## HIGH CLIENT RETENTION

We must do something right as most of our customers continue to work with us long after their first project and recommend us to their friends and / or partners.
